CTM GROUNDWORKS

CTM Groundworks, part of the CTM Group Ltd. was formed to service the increasing demands of the Agricultural, and Estate Management market. Specialising in the provision of Access Roads, Farm development, Silage pits, and slurry lagoons.

With over 30 years experience in the construction industry, our staff offer a complete management service to the client, with initial site survey, design, provision of working drawings, planning and environmental discussions, planning applications, and construction of the project.

All our surveys and designs are presented to the client/planning authority in CAD form, computer generated, to emphasise our professional approach. Landscaping and calculation of quantities, to prevent Environmental issues are discussed with the relevant authorities before any submission is made to planners, thus reducing any possible delay in gaining consent.

Upon gaining consent the project is "set out" with a professional team of surveyors, ensuring correct line and level. Thus ensuring lagoons, etc. are as per drawing.

All plant and materials and supervision is supplied by CTM, thus leaving the client/farmer free, to carry out his normal duties.
